

West Mobile Youth Athletic Association (Mobile, AL)

Model 3260 Football Scoreboard

- 20 ft. x 8 ft.
- Top ID Panel 20 ft. x 8 ft.

Customer Comments:

“It was a joy to work with Electro-Mech through the entire process of purchasing our scoreboard. From choosing which model fit our needs and budget, fitting our artwork onto the board, assisting us with choosing a great local contractor, even correcting the mistake that was discovered after the board was delivered. It’s easy to write a letter when there are no issues to deal with, but your company worked hand in hand with our local government engineers to ensure that everything was up to code. And when we did have an issue, you stepped up and made sure that everything was taken care of. We can’t begin to thank you enough for being such a professional company. The children involved in our program as well as their parents and the Board of Directors have all enjoyed the scoreboard tremendously. I will definitely recommend Electro-Mech to any and all of our local parks who may be in the market for a new scoreboard.”
