- One Video Input

Customer Comments:

“Our scoreboard and accompanying video board have been the hottest topics of conversation with visitors making their first trip to our stadium. The board is a simple, but classy design. We do not cover the board itself with a lot of advertisements that would take away from its main purpose. We use the video board for advertisements, starting lineups, introductory video, and animation. We have encased the board in brick, and we have used the bottom signage to denote our 2009 State Championship.” -Steve Smith - Head Coach
